

## REVIEW QUESTIONS

### The Origin of the Species

Lesson 27

4/4/21

Take some time to think through the things we talked about in our last lesson and review your notes. Then briefly answer the review questions below.

1. What are the two definitions of evolution that are included in Darwinism?
2. What did Darwin propose that distinguished his theory from other versions of evolution being proposed at the time?
3. What are the two assumptions about the Darwinian mechanisms that underlie Darwinian evolution?
4. What is the difference between microevolution and macro evolution?
5. What is the difference between Neo-Darwinism and Darwin's original theory.
6. How does the fossil record create difficulties for the Neo-Darwinian view of evolution?
7. What is irreducible complexity and how does it undermine the idea of evolution?
8. What are the three primary theistic views regarding evolution?
9. What are some difficulties confronting theistic evolution?
10. What was the most helpful thing you learned in this lesson, or was perhaps particularly new or interesting to you?
